Intro to ⬟ SketchUp

Monday, September 30, 6:00-8:00 pm

2nd floor Training Center
Sign up online starting Sept. 9th http://goo.gl/uJyGGo
Free! Registration required.

Explore your creativity with SketchUp, a powerful application for creating 3D models of familiar objects and brand new objects. Participants will learn how to draw, scale, rotate, extrude, offset, and personalize several geometric figures and use these skills to create complex 3D solids. Other topics include taking virtual tours through models, embedding model images into documents, exporting models for 3D printing, and downloading & customizing models from SketchUp's 3D warehouse.

Instructor: Eric Welker
